INTO THE WEST

```
G                         Em
When I was a boy I travelled the roads
                    C                    D
Nothin' but the wild west wind ahead of me
     G                      Em
Then I went to the city, put on a suit
       C                        Am
Like a straitjacket, it nearly choked me
         A                     A maj7
And I listened to all their corporate lies
          D              Dm
But they never really fooled me
   A                                    A7
'Cause the song in my heart, nearly broke through my chest
       D                           Dm
And I knew that the fire would drive me out of my skull
        C
If I didn't get back to the west

```

```
      G           Em           G           C
Ah the old days are gone and your freedom's gone with them
        G         Em           C             Am
But the memories remain, ah they're always there tormentin'
             G                          Em
Just when you think you've found some peace
           G              C
A pair of black eyes sends you reelin'
         G            Em           C
And the road rears up her head and you know you've got the
Am
feelin'
          A                        A maj7
For the rain in your face - the sun in your hair
     D              E
The fire in your blood roarin' again
      A                        A maj7
The earth beneath your feet - not like these streets
   D
Chains around your chest
            E
And you got to get back to the west
